Senior UX/Product Designer specializing in complex financial products, AI-powered experiences, user research, design systems, and large-scale digital ecosystems.

CORE DIFFERENTIATORS

Specializations: AI product design, Enterprise UX, User research, Usability testing, Design systems, Complex data-heavy experiences, Accessibility, End-to-end product design

WORK EXPERIENCE

Russell Investments

April 2024 – Present

Sr. UX Designer

Mumbai, India

- Led UX for complex financial products and digital experiences used across global markets, partnering with product, engineering, content and business teams from discovery through production.
- Designed an AI-first search experience for a 10K–50K monthly-user audience, combining conversational AI with guided navigation after research revealed discoverability challenges for new users.
- Redesigned a fund discovery experience used by ~300 clients, transforming 30+ funds from a dense information list into a structured, searchable and comparison-focused experience.
- Co-owned a 50+ component design system, defining tokens, states and reusable patterns and partnering with developers through implementation, QA, UAT and production.
- Contributed to the redesign and AEM replatforming of a 200+ page global website across 13 countries and three audience groups, improving accessibility scores from 70 to 80.
- Independently led UX research across institutional products, financial portals, websites and campaigns, using interviews, surveys, usability testing and Figma A/B tests to influence product and design decisions.

TYS PMC

May 2023 – April 2024

UI/UX Designer

Mumbai, India

- Led a 7-member design team delivering UX/UI for e-commerce and D2C brands across F&B, apparel, and lifestyle.
- Designed and optimized Shopify storefronts, landing pages, product and checkout experiences with a focus on conversion, engagement, CTR and AOV.
- Partnered with marketing, growth and development teams to translate performance data into design improvements and manage end-to-end production and implementation.
